I am opposed to HB 6656

This bill will contribute to a class system in the case of firearms ownership by law abiding citizens. Those of average means will not be able to afford this insurance as well as other onerous costs being proposed on gun owners.

If insurance providers do insure gun owners, the coverage will undoubtedly be limited since they will not insure crimes. Legitimate gun owners do not create mayhem with their use of firearms. So what's the point? The point is to put another financial burden on law abiding gun owners of average means. Obviously, this is contrary to the spirit of the second amendment to the constitution.

I respectfully urge you to concentrate your efforts on improving Connecticut's mental health system and school security. This move toward insuring lawful gun owners will do nothing to deter crime.

Respectfully submitted

Ronald J Iannucci Sr.
